11. Risk and Compliance

EXECUTIVE SUMMARY:

{{EXECUTIVE_SUMMARY}}

USER PERSONAS:

Persona 1:

Pooja Sharma

Age: 35

Background: Pooja is a homemaker in Gurgaon who hand-embroiders kurtis and designs custom jewelry. She wants to earn a supplementary income from home to support her family's expenses without compromising on her family time.

Tech Comfort: She is comfortable using WhatsApp and browsing social media but finds complex app interfaces daunting.

Primary Goal: To easily list and sell her handmade products to customers in her building and nearby areas, earning ₹15,000-₹20,000 per month.

Key Frustrations: ['Limited customer reach beyond her immediate social circle and WhatsApp groups.', 'High commission rates on existing e-commerce platforms that eat into her profits.', 'Difficulty in managing orders and payments efficiently.']

Key Needs: ['A simple, visual interface to upload product photos and descriptions.', 'Direct messaging with customers to clarify orders and preferences.', 'Secure and easy payment processing (UPI).', 'Clear visibility of earnings and order history.']

Quote: "I make beautiful things at home, but only my neighbors know. I wish I could reach more people nearby without big fees."

Persona 2:

Amit Verma

Age: 30

Background: Amit is a software engineer living in a large residential complex in Noida. He actively seeks unique, handmade items and prefers supporting local artisans over mass-produced goods.

Tech Comfort: He is highly comfortable with mobile apps and online platforms.

Primary Goal: To discover and purchase authentic, high-quality handmade products from sellers within his neighborhood, fostering a direct connection with the artisans.

Key Frustrations: ['Difficulty in finding reliable local artisans and discovering their products.', 'Lack of trust and transparency in online marketplaces regarding product authenticity.', 'Inconvenience of dealing with sellers outside his immediate vicinity for small purchases.']

Key Needs: ['A curated feed of products from nearby sellers.', 'Detailed seller profiles and product descriptions emphasizing craftsmanship.', 'Easy in-app

communication to ask questions and arrange pickup/delivery.', 'Secure payment options.']

Quote: "I love finding unique crafts from people in my own building. It feels more personal and supports local talent."

Persona 3:

Rina Singh

Age: 42

Background: Rina is a full-time administrator at a local school in Gurgaon, who also sells handmade sarees from her hometown on weekends through a small WhatsApp group. She wants to expand her reach locally.

Tech Comfort: She uses a smartphone daily for communication and basic browsing.

Primary Goal: To increase her sales volume by reaching more potential customers within a 2km radius and to manage her small home business more professionally.

Key Frustrations: ['Her current WhatsApp group is informal and difficult to manage for multiple orders.', 'She lacks the technical skills to set up an independent e-commerce website.', 'She wants to offer a slightly more premium service to select customers.']

Key Needs: ['A dedicated platform to showcase her saree collection with clear pricing.', 'Tools to manage inventory and track sales efficiently.', 'An option to

offer exclusive deals or featured listings to increase visibility.', 'Reliable payment and order confirmation system.']

Quote: "My sarees are beautiful, but I only sell to people I know. I need a better way to show them to others in my area."

USER STORIES:

[PRIMARY USER TYPE STORIES]

- As a micro-entrepreneur, I want to easily create a seller profile with my name, location, and a brief description, so that customers can learn about me.
- As a micro-entrepreneur, I want to upload multiple high-quality photos of my products with clear descriptions and pricing, so that customers can see what I offer.
- As a micro-entrepreneur, I want to set my product availability (in stock, out of stock), so that I don't oversell.
- As a micro-entrepreneur, I want to receive instant notifications for new customer messages and orders, so that I can respond promptly.
- As a micro-entrepreneur, I want to chat directly with customers within the app to discuss product details or delivery, so that I can provide personalized service.
- As a micro-entrepreneur, I want to view a list of all my active orders and their status, so that I can manage my workflow.
- As a micro-entrepreneur, I want to receive payments directly to my bank account via UPI after a successful transaction, so that I have easy access to my earnings.

- As a micro-entrepreneur, I want to track my sales performance and earnings within the app, so that I can understand my business growth.
- As a micro-entrepreneur, I want to be able to mark an order as 'completed' after successful pickup or delivery, so that the transaction is finalized.
- As a micro-entrepreneur, I want to be able to block or report a problematic buyer, so that I can maintain a safe selling environment.

[SECONDARY USER TYPE STORIES]

- As a customer, I want to easily find products from sellers within my residential complex or a 2km radius, so that I can shop locally.
- As a customer, I want to browse products by category (e.g., Sarees, Jewelry, Home Decor), so that I can quickly find what I'm looking for.
- As a customer, I want to view detailed product information, including multiple images, description, and price, so that I can make an informed purchase decision.
- As a customer, I want to be able to message sellers directly within the app to ask questions or negotiate, so that I can get personalized information.
- As a customer, I want to see seller ratings and reviews, so that I can gauge their reliability.

- As a customer, I want to receive order confirmations and updates within the app, so that I am informed about my purchase status.
- As a customer, I want to make payments securely using UPI or other convenient methods, so that my transaction is safe.
- As a customer, I want to be able to mark an order as 'received' after pickup/delivery, so that the seller is notified.
- As a customer, I want to be able to save favorite sellers or products for future reference, so that I can easily revisit them.
- As a customer, I want to report any fraudulent activity or issues with a seller or product, so that the platform remains safe and reliable.

[ADMIN/MODERATOR STORIES]

- As an admin, I want to view a dashboard of all registered sellers and their product listings, so that I can monitor the marketplace.
- As an admin, I want to view a list of all transactions happening on the platform, so that I can track revenue and commissions.
- As an admin, I want to be able to suspend or ban sellers who violate platform policies, so that I can maintain marketplace integrity.

- As an admin, I want to view user support requests and manage them, so that I can resolve customer issues.
- As an admin, I want to see basic analytics on platform usage, such as popular product categories and seller activity, so that I can understand growth trends.
- As an admin, I want to be able to send targeted push notifications to users (e.g., new seller announcements, promotional campaigns), so that I can drive engagement.

FEATURE LIST:

MVP (Must Build for Launch)

['User Authentication (Mobile Number + OTP): Allows sellers and customers to register and log in securely using their mobile numbers and OTP, a standard and trusted method in India.', 'Seller Profile Creation: Enables sellers to create a basic profile with their name, location, and a short bio to build trust.', 'Product Listing Management: Sellers can upload product images, add descriptions, set prices, and mark availability, crucial for showcasing their goods.', 'Hyper-local Product Discovery: Customers can browse products listed by sellers within a defined radius (e.g., 2km) of their current location or a specified address.', 'In-App Messaging: Facilitates direct communication between buyers and sellers for inquiries, negotiations, and coordination of pickup/delivery.', 'Order Management (Seller View): Sellers can view incoming orders, update their status (e.g., 'Pending', 'Shipped/Ready for Pickup', 'Completed'), and manage their sales.', 'Order Management (Customer View): Customers can track the status of their placed orders and receive

notifications.', "Payment Integration (UPI via Razorpay): Securely processes transactions using India's popular UPI system, with Razorpay as the gateway.", 'Basic Transaction Tracking: Records all completed transactions for commission calculation and reporting.', 'Push Notifications: Informs users about new messages, orders, and status updates, ensuring timely engagement.']

Phase 2 (After Key Milestone)

['Seller Ratings & Reviews: Allows customers to rate and review sellers, building social proof and trust.', 'Wishlist/Favorites: Customers can save products or sellers they are interested in for later.', 'Search & Filtering: Advanced search and filtering options for products based on keywords, categories, and price range.', 'Basic Analytics Dashboard (Seller): Provides sellers with insights into views, orders, and earnings.', 'Location-Based Seller Recommendations: Suggests sellers to customers based on their past interactions and preferences within their vicinity.']

Future (Long-term Roadmap)

['Scheduled Pickup/Delivery Slots: Allows buyers and sellers to schedule specific times for transactions.', 'Group Buying/Community Deals: Enables users within a neighborhood to form groups for bulk purchases at discounted rates.', 'Seller Subscription Tiers: Introduces premium subscription plans with advanced features like featured listings, analytics, and promotional tools.', "Multilingual Support: Extends the app's language options to cater to a wider range of users across different Indian regions.", 'Integration with Local Delivery Partners: For sellers who wish to offer delivery beyond immediate pickup, integrating with local courier services.']

WIREFRAME DESCRIPTIONS:

[{'Screen N': 1, 'Screen Name': 'Onboarding & Login/Signup', 'Purpose': 'To allow new users to register and existing users to log in to the app.', 'Key Elements': ['App Logo', 'Welcome message', 'Mobile Number input field', 'OTP input field', 'Login/Signup button', 'Option to switch between Login and Signup'], 'User Action': 'User enters their mobile number, receives an OTP, enters the OTP, and proceeds to login or signup.'}, {'Screen N': 2, 'Screen Name': 'Seller Profile Setup', 'Purpose': 'To enable sellers to create and manage their public profile.', 'Key Elements': ['Profile Picture upload', 'Seller Name input field', 'Shop/Business Name input field', 'Short Bio/Description textarea', 'Location display (auto-detected or manually set)', 'Save Profile button'], 'User Action': 'Seller uploads a photo, fills in their details, and saves their profile.'}, {'Screen N': 3, 'Screen Name': 'Product Listing Creation', 'Purpose': 'To allow sellers to add new products to their catalog.', 'Key Elements': ['Product Image Upload (multiple)', 'Product Name input field', 'Product Description textarea', 'Category selection dropdown', 'Price input field', 'Stock Availability toggle/input', 'Add Product

button'], 'User Action': 'Seller uploads images, provides product details, sets price and stock, and adds the product.'}, {'Screen N': 4, 'Screen Name': 'Home/Discovery Feed', 'Purpose': 'To display products from nearby sellers to customers.', 'Key Elements': ['Search bar', 'Category filters (scrollable horizontal list)', 'Product cards (image, name, price, seller name)', 'Map view toggle (optional for MVP)', 'Floating Action Button (FAB) for 'Add Product' (for sellers)'], 'User Action': 'Customer browses products, searches, or filters. Seller sees FAB to add new products.'}, {'Screen N': 5, 'Screen Name': 'Product Detail Page', 'Purpose': 'To show detailed information about a specific product.', 'Key Elements': ['Image carousel/gallery', 'Product Name', 'Seller Name (clickable to profile)', 'Price', 'Detailed Description', 'Availability Status', 'Add to Cart/Buy Now button', 'Message Seller button'], 'User Action': 'Customer views product details, decides to buy or message the seller.'}, {'Screen N': 6, 'Screen Name': 'Chat Screen', 'Purpose': 'To facilitate real-time messaging between buyer and seller.', 'Key Elements': ['Chat header (Seller/Buyer Name)', 'Message list (sent and received messages)', 'Message input field', 'Send button', 'Timestamp for messages'], 'User Action': 'User types and sends messages, views conversation history.'},

{'Screen N': 7, 'Screen Name': 'My Orders (Customer)', 'Purpose': 'To display a list of orders placed by the customer.', 'Key Elements': ['Order list items (product image, name, status, date)', 'Filter by status (Pending, Completed)', 'Order details view on tap'], 'User Action': 'Customer views their order history and checks the status of current orders.'}, {'Screen N': 8, 'Screen Name': 'My Orders (Seller)', 'Purpose': 'To display a list of orders received by the seller.', 'Key Elements': ['Order list items (product image, name, customer name, status, date)', 'Filter by status (New, Pending, Completed)', 'Action buttons (e.g., 'Mark as Ready', 'Mark as Completed')', 'Tap to view order details'], 'User Action': 'Seller views new and existing orders, updates their status.'}, {'Screen N': 9, 'Screen Name': 'Payment Screen', 'Purpose': 'To process payment for an order.', 'Key Elements': ['Order Summary (items, total amount)', 'Payment Method selection (UPI)', 'UPI ID input field (or deep link to UPI app)', 'Confirm Payment button'], 'User Action': 'Customer selects UPI, enters their UPI ID, and confirms payment.'}, {'Screen N': 10, 'Screen Name': 'Seller Dashboard/Home', 'Purpose': 'To provide sellers with an overview of their business and quick access to key actions.', 'Key Elements': ['Total Earnings', 'Number of Active Orders', 'Number of

Products Listed', "Quick links to 'My Products', 'My Orders', 'Add Product'"], 'User Action': 'Seller reviews their business performance and navigates to different sections.'}]

API ENDPOINT LIST:

{'AUTH ENDPOINTS': ['POST /api/v1/auth/register — Registers a new user with phone number and OTP, returns user token.', 'POST /api/v1/auth/login — Logs in an existing user with phone number and OTP, returns user token.', 'POST /api/v1/auth/verify-otp — Verifies the OTP sent for registration or login.', 'POST /api/v1/auth/resend-otp — Resends OTP to the registered mobile number.'], 'SELLER ENDPOINTS': ['POST /api/v1/sellers/profile — Creates or updates a seller's profile.', 'GET /api/v1/sellers/profile — Retrieves the logged-in seller's profile.', 'POST /api/v1/products — Creates a new product listing.', 'GET /api/v1/products — Retrieves a list of products for the logged-in seller.', 'GET /api/v1/products/{productId} — Retrieves details of a specific product.', 'PUT /api/v1/products/{productId} — Updates an existing product listing.', 'DELETE /api/v1/products/{productId} — Deletes a product listing.', 'GET /api/v1/sellers/orders — Retrieves all orders for the logged-in seller.', 'PUT /api/v1/sellers/orders/{orderId}/status — Updates the status of a seller's order.'], 'CUSTOMER ENDPOINTS': ['GET /api/v1/products/nearby — Retrieves a list of

products available within a specified radius.', 'GET /api/v1/products/{productId} — Retrieves details of a specific product.', 'POST /api/v1/orders — Creates a new order for a customer.', 'GET /api/v1/customers/orders — Retrieves a list of orders for the logged-in customer.', 'PUT /api/v1/customers/orders/{orderId}/status — Updates the status of a customer's order (e.g., 'Received').', 'POST /api/v1/sellers/rate — Allows a customer to rate a seller after an order is completed.'], 'MESSAGING ENDPOINTS': ['GET /api/v1/chats/{chatId}/messages — Retrieves messages for a specific chat (order-related or direct).', 'POST /api/v1/chats/{chatId}/messages — Sends a new message in a chat.'], 'PAYMENT ENDPOINTS': ['POST /api/v1/payments/create-order — Initiates a payment for an order via Razorpay, returns payment details.', 'POST /api/v1/payments/webhook — Receives payment confirmation from Razorpay and updates order status.'], 'ADMIN ENDPOINTS': ['GET /api/v1/admin/users — Retrieves a list of all users.', 'GET /api/v1/admin/sellers — Retrieves a list of all sellers.', 'GET /api/v1/admin/orders — Retrieves all orders on the platform.', 'PUT /api/v1/admin/users/{userId}/status — Activates/Deactivates a user account.', 'POST

`/api/v1/admin/notifications` — Sends a push notification to specified users or segments.']}}

TECH STACK

RECOMMENDATION:

Frontend / Mobile:

Component	Technology	Reasoning
Mobile App	React Native	Allows for cross-platform development (iOS & Android) from a single codebase, significantly reducing development time and cost, which is critical for the given budget and timeline.
Web Frontend	{{STACK_WEB_FRONTEND}}	{{STACK_WEB_FRONTEND_REASONING}}
Stack Management		

Backend & Infrastructure:

COST & TIMELINE ESTIMATE:

Development Cost Breakdown:

Role	Hours	Rate (₹/hr)	Total (₹)
Backend Developer	600	1200	720,000
Mobile Developer (React Native)	600	1000	600,000
UI/UX Designer	200	800	160,000
QA Tester	150	600	90,000
Project Manager/Tech Lead	100	1500	150,000

Total Development Cost: ₹1,720,000

First Year Additional Costs:

Hosting & Infrastructure (Year 1):	₹120,000
Third-party APIs & Services (Razorpay, SMS, Maps):	₹80,000
Legal & Compliance Setup (Privacy Policy, ToS):	₹50,000
QA & Testing Tools:	₹30,000

Total Additional Costs: ₹280,000

Total First Year Budget: ₹2,000,000

Timeline: 6 months with 1 Backend Developer, 1 Mobile Developer (React Native), 1 UI/UX Designer, 1 QA Tester, 1 Project Manager/Tech Lead developers

HIRING RECOMMENDATION:

Recommended Approach:

Given the budget of ₹2-5 lakh for MVP and a timeline of 3-6 months, a hybrid approach is recommended. Hiring a small, agile team of freelancers or a boutique development agency specializing in mobile apps is the most practical strategy. This allows for flexibility and cost-effectiveness compared to hiring full-time employees. Focus on developers with proven experience in building marketplaces, e-commerce features, and integrating payment gateways, especially within the Indian context. Look for individuals or small teams based in Tier 2 or Tier 3 cities in India, as they often offer competitive rates while maintaining high quality.

Prioritize candidates who demonstrate strong communication skills and a good understanding of the product's vision. For the UI/UX designer, look for someone who can create intuitive and user-friendly interfaces, especially considering the moderate tech comfort of the primary user persona. The QA tester should have experience in mobile app testing,

including functional, usability, and performance testing. A part-time or fractional Project Manager/Tech Lead will be crucial for overseeing the development process, ensuring deadlines are met, and managing the communication flow between the founder and the development team.

Where to Find Developers:

['Upwork/Fiverr: Good for finding individual freelancers for specific roles (e.g., React Native developer, Node.js developer). Expect rates from ₹800-₹1500/hr depending on experience and location.', 'Toptal: For highly vetted, top-tier developers. More expensive but can be a good option for critical roles if budget allows.', 'LinkedIn: Excellent for finding experienced developers and small agencies. Allows for direct networking and reviewing profiles/company pages.', 'Indian Developer Communities (e.g., local meetups, GitHub, Stack Overflow): Can help find passionate developers who might be open to project-based work or have connections.', 'Referrals: Leverage your network for recommendations. Personal references often lead to more reliable candidates.']

Red Flags to Watch:

['Lack of a clear portfolio demonstrating relevant marketplace or e-commerce app development.', 'Poor communication skills or slow response times during the initial hiring process.', 'Unwillingness to use version control (like Git) or follow standard development workflows.', 'Over-promising on timelines or underestimating the complexity of features.', 'Inability to explain technical concepts in a way the founder can understand.', 'Lack of familiarity with Indian payment gateways (especially UPI) or local market nuances.']

RISKS & COMPLIANCE:

Key Risks:

Sr. No	Risk Description	Mitigation Strategy
